

WEL-COME TO

STARMET GAUGES AND
SERVICES

INTRUDUCTION

We are pleased to introduce ourselves as professionals having over one & half decades of valued experience and expertise in the field of Dimensional Metrology. We are detailing below our Company profile for your kind perusal to enable you to consider us as one of your valued distributor

It is our commitment to be a Customer Driven Organization and will therefore be our passion to keep Our Valued Customer in Focus and delighted in all respects. Customer satisfaction is the foundation for good business results. Our innovation and long-term business development with a stable relationship network are part of our mission.

In view of the above specialization, competency and infrastructure setup, we request you send us your vendor registration form to enable us to register as us as one of you suppliers and service providers in your esteemed organization. and extend to us the opportunity to serve you in times to come.

Thanking you and assuring you of our continued support and best services at all times.

We are Manufacturer of Following Items.

- Electronic and Air Electronic Digital Display Unit up to Eight channels. (STD / NON STD)
- Data Logger with Keyboard (Reading Save with Job number)
- Dial Type Air Gauge Unit (PFL).
- Auto Gauging and Multi Gauging fixtures.
- Squareness Checking System for Gear face to ID (Center Distance, Concentricity)
- Air Plug Gauges and Contact Type Gauges (Steel and Carbide)
- Air Ring Gauges (Steel and Carbide)
- Carbide Air Snap (Caliper) Gauges / Multi Jet Carbide Snap (Caliper) Gauges
- Taper Air Plug & Taper Air Ring Gauges with Display Unit
- Master Setting Ring / Disc in (Steel / Carbide)
- Plan Plug Gauges in (Steel / Carbide)
- (AMC) Any make Air Unit / Electronic Unit Servicing & Calibration. Repairing & Spares also.....

Index

- 1. Analog Air Gauge Unit
- 2. Air Plug Gauges & Setting Rings
- 3. Air Ring Gauges & Setting Plug
- 4. Air Calipers & Setting Discs
- 5. Digital Air Electronic Unit
- 6. Multi Channel Digital Air Electronic Unit
- 7. Column Type Air Electronic Unit
- 8. Multi-Gauging & Fixtures
- 9. Electronic Axial Probes.
- 10. C-jet dial type Air Gauge Unit
- 11. Universal Air Gauge Unit
- 12. Snap Gauge

- 13. Plain Plug Gauge
- 14. Plain Ring Gauge
- 15. Refractometer
- 16. Measuring Instruments
- 17. Pneumatics spares

: Dial Type Air Gauge Unit

- Dial type Module 1A Air Gauge unit attached with
- T-win Filter, Regulator and Monogauge assembly
- High pressure faster response time & self cling of gauging area
- Range : +/- 40um
- Least count : 1um
- APG/ARG/ACG can be accommodated
- Air gauge unit Module 1A & Module 2A

: Air Plug Gauges & Setting Rings

- For checking internal diameter
- For checking through / blind bores
- For check deeper holes by Suitable extensions
- Can be supplied suitable to any make air gauge unit
- 2 jet air plug gauge 4 to 200 mm in steel material
- Air plug available to steel & carbide material

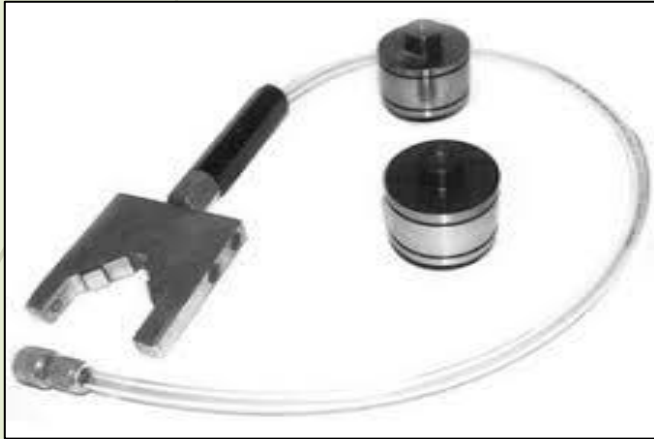

:Air Ring Gauges & Setting Plug

- For checking external diameter.
- For checking offset / central jet
- Can be supplied suitable to any make air gauge unit
- 2 jet air plug gauge 6 to 200 mm in steel material
- Air ring available to steel & carbide material
- Bench Mounted ARG as per requirements

:Air Calipers & Setting Discs

- For checking external diameter for shafts
- For checking offset / central jet
- Can be supplied suitable to any make air gauge unit
- Range 6 to 200 mm in steel material
- Carbide measuring faces and rest pads

:Digital Air Electronic Unit

- Tri Color 7 Segment Display
- RS 232 Output
- Facility to program for 10 different type of parameters
- Aig gauge can be directly connected
- RGY based on the tolerance.
- In built air saving facility
- Least count 1 μm ./0.1 μm
- Low maintenance
- Facility of obsoleted & comparative type of reding.

:Multi Channel Digital Air Electronic Unit

- Tri Color 7 Segment Display
- Auto mastering facility
- RS 232 Output
- Two display in single unit
- Two different parameter can be checked in single unit
- Facility to program for 10 different type of parameters
- Aig gauge can be directly connected
- RGY based on the tolerance.
- In built air saving facility
- Least count 1 um.
- Low maintenance
- Facility of obsoleted & comparative type of reding

:Column Type Air Electronic Unit

- Single Channel Tri Color Bar Graph Column Type Air Electronic Unit
- Inch and Metric Ranges
- Static/ Dynamic Measurement
- Compatible with half bridge & full bridge LvdT probe
- Pneumatic converter without flow control valves
- RS 232 Output
- Facility of Absolute & comparative type of reding.

:Multi-Gauging & Fixtures

- We can manufacture multi gauging stations as per customers requirement
- Checking for multiple diameter:
- ID & OD, Ovality, Thickness, Taper, Width, Height, Runout, Shaft Length, Flatness, Squareness, CD Checking, Perpendicularity, PCD Runout, etc...

:Electronic Axial Probes

- Rang +/- 1.0 mm
- Pre travel adjustment

: C-jet dial type Air Gauge Unit

- High pressure faster response time & self cleaning of gauging area
- Range : +/- 40um
- Least count : 1um
- Air gauge unit Module Suitable for c-jet

:Universal Air Gauge Unit

- Dial type Universal Air Gauge unit attached with T-win Filter Regulator and Monogauge assembly
- Module - 1A, 2A, 1mm, c-jet, all jet set on Universal unit.
- Setting on out side nob
- High pressure faster response time & self cleaning of gauging area
- Range : +/- 40um
- Least count : 1um

: Our Product

Electronic Edge Finder

Center Drill Depth Gauge

Electronic Z Setter

:Snap Gauge

- Snap gauge are -
- Single End Snap Gauge – “U” Type (1.00mm to 300.00mm)
- Double End Snap Gauge - “H” Type (1.00mm to 300.00mm)
- Material as per requirements
- Available in two types of Material.: Steel | Carbide

:Plain Plug Gauge

- GO & NO GO material as per requirements
- Material as per requirements
- Available in two types of Material.: Steel and Carbide

:Plain Ring Gauge

- Plain Ring Gauge -Setting Ring Gauge-(3.00mm to 300.00mm)
- GO & NO GO material as per requirements
- Available in two types of Material.: Steel and Carbide

:Refractometer

- The refractometer used for measuring the water content of liquids.
- Cutting oil and water mixture.
